

ZipDeploy Full License

If you purchase a Full License, you will be able to run ZipDeploy on as many websites as you want. As long as you want.

Like with the ZipDeploy Site-Limited License, as a registered customer, you will also benefit from our support for any of your questions.

All upgrades are and will be forever free of charge.

You will always be notified when a new release is ready.

With your Serial Number you may use any or both of the ZipDeploy executable formats (Windows and Linux). If / when a release will be available for MacOS, FreeBSD or other platform you will be allowed to use that too. Of course, one at the time. How much?

Ten US dollars.

Remember! ZipDeploy is cheap. How can I purchase ZipDeploy?

Using PayPal. We have implemented an automated system that emails you a serial number seconds after your PayPal transaction is complete. The whole process takes less than a minute, to be as painless as possible. PayPal is not available in my country ...!?!?!?

I know, it's a shame. Write me personally and we may find a solution: [webmaster \[at\] zipdeploy.com](mailto:webmaster@zipdeploy.com)

NOTE: Test your site to be compatible with ZipDeploy before actually proceeding to the purchase.
